

Agentic Data Management for Trusted AI & Analytics

Unify data observability and AI-driven automation with ADM. Ensure trusted data pipelines, reliable AI outcomes, and business-ready insights—at any scale.

- ✓ For your Enterprise Data Systems
- ✓ In cloud, on-premises, and hybrid environments
- ✓ For data at rest, in motion, and at consumption

Why Agentic Data Management Is Essential Now

Data is the foundation of modern AI-driven enterprises—but complexity, scale, and blind spots create systemic risks:

Complex pipelines & fragmented stacks slow down delivery

Legacy monitoring tools fail to scale with AI and cloud-native platforms

Unmonitored blind spots lead to downtime, trust erosion, and cost overruns

Enterprises today cannot afford to have data quality issues, pipeline failures, data downtimes, and operational inefficiencies. Business impact of inaction :

- Productivity loss & higher costs
- Revenue leakage & competitive disadvantage
- Reduced trust in AI and analytics
- Operational risk exposure
- Delayed innovation cycles
- Customer dissatisfaction

How Acceldata Delivers Trusted Data at Scale

With **Acceldata Agentic Data Management (ADM)**, enterprises unify observability with AI agents that act across the entire data lifecycle.

Observe

Full-stack observability into data pipelines, quality, lineage, and infrastructure.

Resolve

AI agents detect, diagnose, and fix anomalies before they impact business outcomes.

Optimize

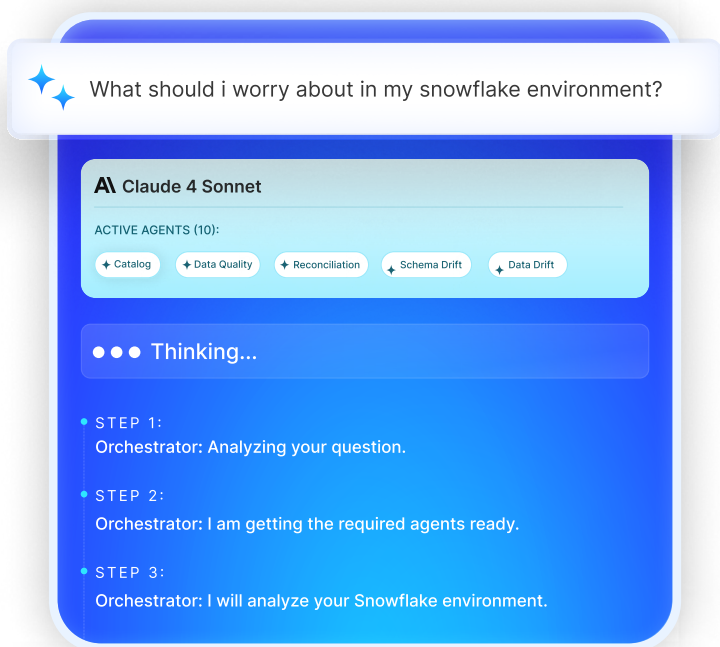

Intelligent recommendations reduce costs (Snowflake, Databricks, etc.) and improve efficiency.

Innovate

Enable trusted AI and next-gen analytics with confidence in your data.

Why choose Acceldata?

✓ Agentic by Design

AI agents built for data reliability, governance, and quality.

✓ Cloud-Scale Ready

Handle petabyte-scale data across pipelines and platforms.

✓ Fast Time-to-Value

Deploy in minutes, integrate seamlessly with Snowflake, Databricks, Spark, Kafka, and more.

✓ Adaptive Automation

Agents continuously learn, adapt, and optimize data operations.

✓ Proven with Enterprises

Trusted by leading global brands across healthcare, retail, CPG, financial services, and telecom.

The Power of Acceldata Data Observability Cloud (ADOC)

Our cloud-native foundation provides

End-to-end observability - pipelines, quality, lineage, cost

Embedded AI agents for auto-detection and resolution

Unified experience across business, data, and AI teams
